

Alina Avanesyan, Ph.D.

Postdoctoral Associate
Department of Entomology
University of Maryland,
College Park, MD 20742
alina@umd.edu
<http://alinaavanesyan.com>

Summary

- **Areas of expertise:** evolutionary ecology, entomology, molecular biology, organismal biology
- **Research experience:** plant-insect interactions and insect biology (7 years), phylogenetics (2 years), population genetics (2 years), cellular immune responses of invertebrates to infection by parasites (5 years)
- **New methods developed:** (a) PCR-based method for detecting plant DNA within grasshopper gut contents; (b) non-destructive method for estimating plant biomass change in grasses; (c) protocol for determining drosophila mating status by tissue dissection and isolation of spermathecae (*all published*)
- **Publications, presentations:** 14 peer-reviewed publications, 17 conference presentations, three invited talks
- **Selected courses taught (lectures and/or laboratories):** Invertebrate Zoology, Animal Ecology, Introductory Biology, Microbiology, Genetics and Cell Biology, Molecular Biology

Education

- **Ph.D.**, Biological Sciences (2014). University of Cincinnati. *Dissertation:* Native versus exotic grasses: the interaction between generalist insect herbivores and their host plants
- **Candidate of Science (Ph.D.-equivalent)**, Biological Sciences (2002). Herzen State University, St. Petersburg, Russia. *Dissertation:* The effect of defense responses of snails on development of trematode partenitae (with a focus on the family Echinostomatidae)
- **Diploma**, Biology, Psychology, *cum laude* (1997). Herzen State University, St. Petersburg, Russia

Professional Experience

Postdoctoral Associate, Department of Entomology, University of Maryland, College Park (01/2018–present)

- Research on ecology and evolution of plant-insect interactions with a focus on novel associations between native and exotic species and their effect on natural and managed systems
- Current projects: (a) herbivore resistance in *Miscanthus sinensis* cultivars; (b) plant DNA detection within gut contents in sap-feeding insects; (c) biodiversity of agricultural drainage ditches; (d) plant resistance traits and insect plant host usage (large-scale meta-analysis); and (e) host plant usage of the spotted lanternfly (the grant proposal submitted)

Planting Science Fellow, Planting Science Program, Botanical Society of America (07/2017–12/2017)

- Online scientist mentor and liaison for high school biology teachers and student research teams (projects on plant photosynthesis and respiration)

Genetics Instructor, Biology Department, Grand View University, Des Moines, IA (08/2016–05/2017)

- Taught upper-level Genetics and Molecular Biology laboratory courses for biotechnology majors

- Trained students in standard molecular biology techniques: DNA extraction, PCR, agarose gel electrophoresis, DNA ligation, transformation, restriction digest analysis, sequence analysis, etc.

Research Associate, Department of Entomology, University of Wisconsin-Madison (04–07/2016)

- Worked on biology and distribution of *Drosophila suzukii*: went on regular field trips in Wisconsin and Minnesota; performed fly collection, identification, lab assays, dissection
- Developed and published a method for determining fly mating status by isolating spermathecae
- Trained high school student in tissue dissection, microscopy, staining, and slide preparation

Postdoctoral Research Associate, Texas A&M AgriLife Research (01–03/2016)

- Developed experimental design for a comparative study of plant resistance to injury from pests

Research Assistant/Teaching Assistant, Department of Biological Sciences, University of Cincinnati (08/2009–08/2014)

- Worked on plant responses to herbivory and insect feeding preferences (dissertation project)
- Designed and conducted field trials on herbivory, greenhouse experiments, and lab insect assays
- Developed and published two new methods: (a) PCR-based method for detecting plant DNA within insect gut contents; and (b) nondestructive method for estimating plant biomass changes
- Performed DNA-based identification and phylogenetic analysis of forensically important flies
- Worked on plant population genetics: performed DNA extraction, PCR, setup sequence reactions
- Taught laboratory courses (Microbiology, Biology Laboratory, Genetics and Cell Biology)
- Went on multiple field trips in Ohio, Maryland, Montana, and Iowa

Researcher, Laboratory of Cell Biology in Culture, Institute of Cytology of the Russian Academy of Science, St. Petersburg, Russia (08/2008–07/2009, part-time)

- Worked on genetic variation and hybridization in littoral snails: performed tissue processing, DNA extraction, PCR, sequence analysis; co-managed database for snail hybridization project
- Trained two students in DNA extraction, PCR, and agarose gel electrophoresis

Visiting Research Scholar, Department of Biology, University of Northern Iowa (01–05/2008)

- Worked on phylogeography of North-American fiddler crabs populations: extracted genomic DNA, conducted PCR, gel electrophoresis; prepared sequence reactions

Instructor/Docent, Department of Zoology, Herzen State University, St. Petersburg, Russia (2002–2009)

- Taught lectures, laboratories and field courses in ecology, biology and invertebrate zoology
- Trained students in microscopy, species identification, invertebrate morphology, basic morphometric analysis, standard bioindication and biomonitoring methods, etc.
- Mentored a total of 11 undergraduate students in research on animal ecology

Research Assistant, Department of Zoology, Herzen State University, St. Petersburg, Russia (1997–2002)

- Worked on cellular immune responses of snails to infection by trematodes (dissertation project)
- Conducted collection, identification, maintaining snails in lab; estimated snail infection rates
- Performed histological analysis of parasite encapsulation by snail hemocytes; morphological analysis of trematode larvae development; snail tissue dissection and processing
- Identified and characterized snail hematopoietic tissue (previously not described)
- Trained three students in tissue processing, dissection, microscopy, and slide preparation

Peer-Reviewed Publications

GenBank Submission

- Backer, S., Christiansen, K., Christofferson, D., Geisinger, S., Graving, S., Jones, K., Miller, R., Omanovic, E., Piatt, D., Reyes-Zuniga, K., Salazar-Klock, L., Sopher, K., Welsch, A., **Avanesyan, A.**, and I. Hazan (2017) *Salvia rosmarinus* isolate rs *GAPC-2* gene, partial cds. Direct Submission, *GenBank* Accession no. MF074139

Grants and Awards

1. Planting Science Digging Deeper Fellowship. Botanical Society of America; 2017; \$2000
2. Entomological Society of America. 1st place in Graduate Student Ten-Minute Paper Competition. Austin, TX; 2013; \$175
3. Entomological Society of America. Eastern Branch. 2nd place in Ph.D. Student Oral Competition. Lancaster, PA; 2013; \$200
4. Wieman Wendel Benedict Awards. Department of Biological Sciences, University of Cincinnati; 2013: \$200; 2012: \$600; 2011: \$1200
5. Graduate Research Fellowship for Outstanding Incoming Ph.D. Students Department of Biological Sciences, University of Cincinnati; 2009; \$3000

Courses Taught

Department of Entomology, University of Maryland, College Park (2018–present):

- Insect Biodiversity: The Good, The Bad and The Weird (HONR208D; *teaching assistant*)
- Aquatic Entomology (ENTM667; *teaching assistant*)

Biology Department, Grand View University (2016–2017):

- Genetics (laboratory; 4 units; 2016–2017; *instructor*)
- Molecular Biology (laboratory; 4 units; 2017; *instructor*)

Department of Biological Sciences, University of Cincinnati (2010–2014):

- Biology Laboratory (laboratory; 4 units; 2011; *teaching assistant*)
- Genetics and Cell Biology (laboratory; 4 units; 2013–2014; *teaching assistant*)
- Elementary Microbiology for Health Professionals (laboratory; 4 units; 2012; *teaching assistant*)
- General Microbiology Laboratory (laboratory; 4 units; 2010–2013; *teaching assistant*)

Department of Zoology, Herzen State University, St. Petersburg, Russia (2002–2009):

- Introductory Biology (lectures, laboratory; 2003–2006; *instructor, docent*)
- General Biology (lectures; 2000–2005; *instructor, docent*)
- Ecology (lectures, laboratory, field course; 2005–2007; *docent*)

- Human Ecology (lectures; 2007; *docent*)
- Animal Ecology (lectures, laboratory; 2003–2009; *instructor, docent*)
- Bioindication (lectures; 2008; *docent*)
- Animal Behavior (lectures; 2004; *instructor*)
- Invertebrate Zoology (laboratory, field course; 2002–2003; *instructor*)

Published Course Materials

1. **Avanesyan, A.** (2003) Animal Ecology: Lecture notes. Herzen State University. St. Petersburg, Russia. 40 p. (In Russian)
2. **Avanesyan, A.** (2003) Animal Ecology: Lab assignments. Herzen State University. St. Petersburg, Russia. 15 p. (In Russian)

Professional Development

- Bayesian Modeling for Socio-Environmental Data: a nine-day short course; The National Socio-Environmental Synthesis Center (SESYNC), Annapolis, MD (May 29-June 8, 2018)
- Digging Deeper Summer Professional Development: a five-day workshop; Biological Sciences Curriculum Study (BSCS), Colorado Springs, CO (July 23-27, 2017)
- Coursework in mathematics (19 credit hours, GPA 4.0): Calculus I, Calculus II, Calculus III, Matrices & Linear Algebra, Differential Equations & Transformations; Department of Mathematics, Iowa State University, Ames, IA (June 2014– May 2015).

Research Skills

- **Field/greenhouse work:** species collection and identification (plants, invertebrates); animal rearing and maintenance of lab colonies (snails, insects); establishing plots, planting, setting up feeding assays; measuring plant biomass, cover, growth, leaf damage, insect food consumption and assimilation, etc.; multiple field trips in Ohio, Maryland, Montana, Iowa, Minnesota, Wisconsin, and Russia
- **Molecular biology:** DNA/RNA extraction, PCR (mitochondrial COI, COII, and ND4; nuclear PER, ITS-1, ITS-2, GAPDH, and RAPD marker; chloroplast *trnL* (UAA) and *rbcL*; plant microsatellite markers), agarose gel electrophoresis, DNA/RNA spectrophotometry, DNA purification; restriction digest analysis, DNA cloning; sequence analysis (editing, aligning, assembling, estimating sequence quality, determining gene structure, etc.), phylogenetic analysis; preparation of human chromosome spreads (using HeLa cancer cells)
- **Cell biology:** protein and enzyme assays (spectrophotometric, colorimetric methods), protein quantification, enzyme activity analysis; cell fractionation (isolating mitochondria and non-mitochondria fractions); morphological analysis of cell proliferation and differentiation (germinal cells), embryo development, cellular composition (invertebrates)
- **Histology, microscopy, cellular immunology:** dissection and tissue isolation, tissue processing, embedding techniques, sectioning tissue using a microtome, differential staining of tissue sections; light microscopy, slide preparation, cell size measurements; identification and characterization of hematopoietic tissue; measuring cross-sectional area and volume of hemopoietic tissue, measuring cell proliferation (by quantification of mitotic activity); morphological analysis of encapsulation of parasites by hemocytes (with a focus on formation of hemocyte aggregations, types of capsules, hemocyte layers in a capsule, adhesion and destruction of a parasite by hemocytes)
- **Microbiology:** aseptic/sterile techniques, culturing, staining (simple, Gram, acid-fast), KOH string

test, microscopic examination of morphological characteristics of bacteria; isolation streaking, measuring cell density, bacteriophage titer analysis; MIC determination, testing for antibiotic sensitivity (dilution method, Kirby-Bauer test); metabolic tests, preparation of Winogradsky columns; complementation test with yeast (*S. cerevisiae*), bacterial conjugation (*E. coli*)

- **Data analysis, programming, computer skills:** R (data analysis), Python (basic programming); Linux shell, Vim (basic usage); HTML/CSS
- **Software:** BioEdit, CodonCode Aligner, MEGA, GeneMarker, CAP3, BLAST
